

# *Tandem*

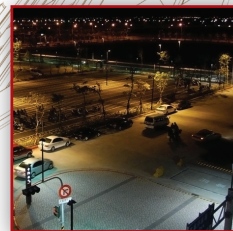

**A Lighting Control  
Network With  
Endless Possibilities.**

*Everything you need to control the lighting within any building complex, big or small, you can get with Tandem. You can automatically turn your lights on and off, dimming them up or down to offset daylight. You can set the lights brighter in the conference rooms and lower in the lounge areas. Everything you could possibly imagine - 0-10V dimming, full communication, centralized control, expandability - is all yours in one cost-effective lighting control network. Best of all it's made right here in America by PLC Multipoint, a company that invented daylight sensor technology.*

*Whatever you can imagine becomes a reality with Tandem Lighting Control Network.*

- 0-10V dimming
- Fully-expandable network
- Direct communication
- Simple commands
- Computer interface
- Up to 48 relays per enclosure
- 4 enclosure sizes
- Pre-programmed control strategies
- Reliable 20A mechanically latching relays
- Multiple scheduling options
- Up to 48 low voltage switches per enclosure
